

THE CANVA BONUS BUNDLE

Launch your website *in style*

I see you working HARD on your new website. It's not easy and there are usually a few head meets desk moments (I still have these too!)

But when it's time to launch, and before you open the champagne, I want to make launching in style a lot easier for you.

We've compiled some of favourite graphic styles that we use to promote our own websites - from simple mockups to animated video backgrounds.

HERE'S WHAT'S INCLUDED

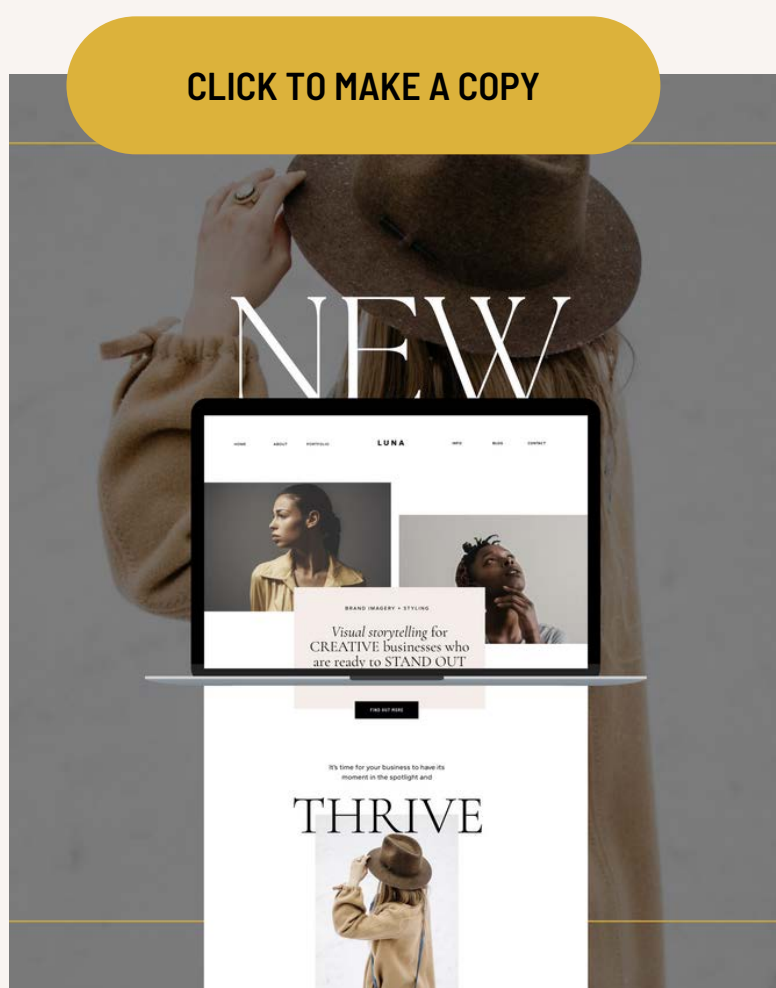

- ✓ Instagram Posts Pack - Website Launch
- ✓ Instagram Stories Reels Pack - Website Launch (resized)
- ✓ 3 Stunning Lead Magnet templates
- ✓ Links to favourite free mockups & video backgrounds

INSTAGRAM POSTS & REELS

We've created 10 beautiful Instagram post feed graphics for you, and resized them so that you can also use them for Stories or Reels.

All of the graphics use free Canva elements and all images are from Unsplash or Pexels and are free for commercial use.

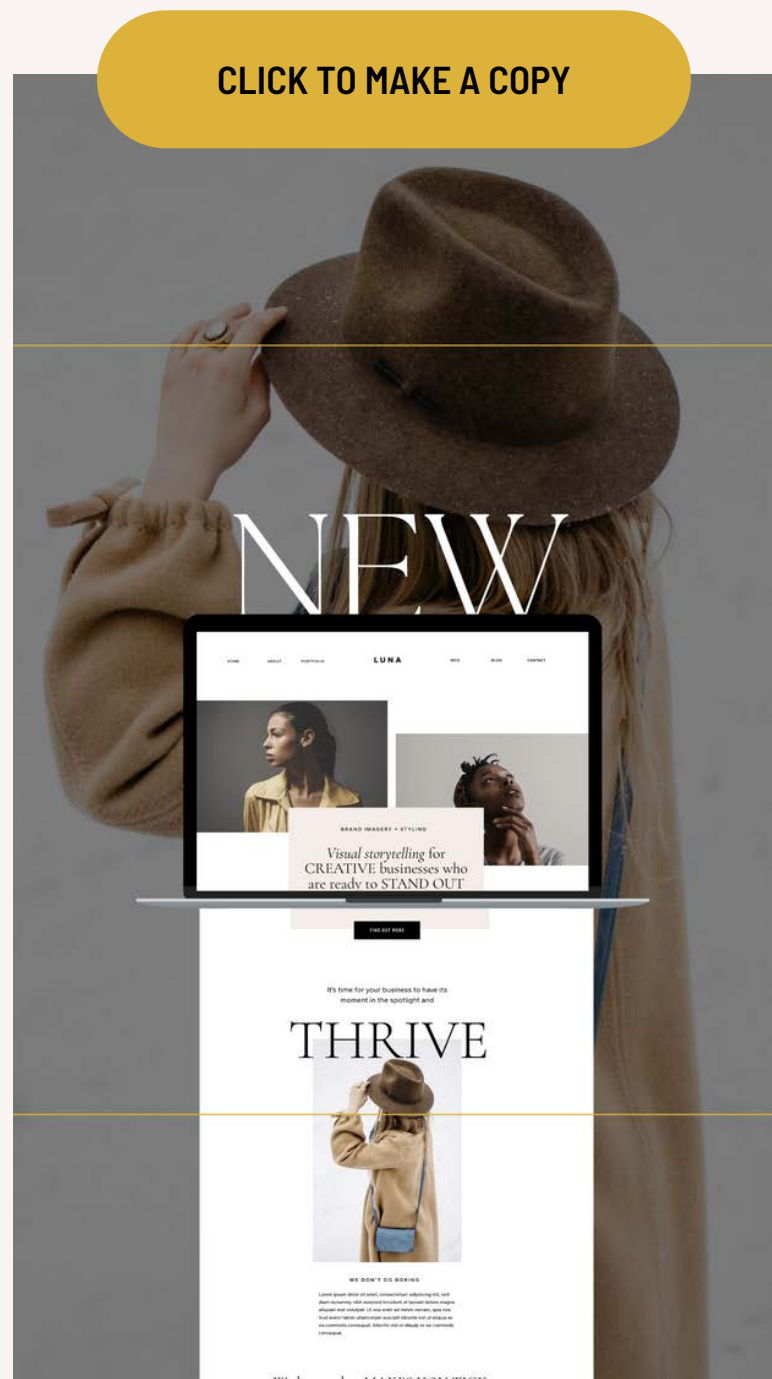

Note: We've included a yellow outline frame, so that you can easily where your image will crop for your main Instagram feed. Don't forget to delete it before you download.

1080 x 1350px (Instagram post)

Top tip:

You can duplicate a graphic several times, add a different screenshot to each frame and save it as an MP4 which you can use as a Reel. Use a jpeg version as your cover.

1080 x 1920px (Instagram Story/Reel)

CANVA LEAD MAGNET TEMPLATES

You've finished your website and your thoughts should be turning to designing a lead magnet to attract your ideal client. Although 'done is better than perfect' why not make sure it's stylish whilst getting it done fast?

Note: These templates can be edited with the free version of Canva but some images may need to be replaced.

OUR FAV RESOURCES

To help you
get creative

We know you'll want to adapt our templates and make them your own. There are some fantastic free images and videos out there which will help you adapt our designs.

One of our favourite places to source mockups and vertical video to use as backgrounds is [Pexels.com](https://www.pexels.com), where all content is free to use in your personal business projects.
